Participants Needed!

Understanding Voices in Noisy Environments

The study investigates the perception of speech and complex sounds.

Participants will be asked to listen to speech sounds while sitting in a brain scanner (MEG) and make responses to those sounds (by clicking buttons)

If you are interested in taking part in this study, please email a.caso@ucl.ac.uk stating your age, and whether you are a native English Speaker.
About the study

Who can take part?

We're looking for volunteers who fit the following criteria:

- Age 55 - 80
- Native English Speaker
- Normal or corrected vision
- No cochlear implant

What can you expect?

Brain Imaging

Volunteers will be sitting in a brain scanner called MEG. The scanner is completely safe, quiet, and painless.

This will take place at The Wellcome Centre for Human Neuroimaging, 12 Queen Square WC1N 3BG

Reimbursement

The study will last approximately 2.5 hours, and volunteers will be paid £25 for their time.

If you are interested in taking part in this study, please email a.caso@ucl.ac.uk stating your age, and whether you are a native English Speaker.
