Participants Needed!

Biomarkers of early stroke recovery

We are looking for participants (50 years and older) to take part as healthy controls, in a study about stroke recovery. This study aims to help better understand the recovery process after a stroke.

This study takes place at 33 Queen Square, London WC1N 3BG.

Email c.zich@ucl.ac.uk with your name, email address and contact number to take part.
About the study

Who can take part?

We’re looking for volunteers who fit the following criteria:
- No history of: stroke, other neurological, or psychiatric disorder
- Able to read and understand english
- 50 years and older

What can you expect?

Brain Imaging

The study will involve Electroencephalography (EEG). EEG is a technique that passively measures brain activity using conductive gel (more information about EEG: https://www.nhs.uk/conditions/electroencephalogram/).
The duration of the session is ~1 hour and comprises: consent, EEG set-up (~10 min), EEG recording during a simple passive movement task (i.e., I will move your index finger up and down) with the left and right hand (each ~6 min), and a EEG recording during rest (~ 6 min).

Reimbursement

Participants will be reimbursed £10/hour and participants can get some money to cover your transport to the study.

Contact c.zich@ucl.ac.uk with your name, email address and contact number to take part.
