

# Participants Needed!

## Thoughts, free association and the brain

In this study we want to understand how people organize and regulate their thoughts. Why do some individuals experience more disorganized thoughts?

Email [k.hoang@ucl.ac.uk](mailto:k.hoang@ucl.ac.uk) with your name, email address and contact number to take part.

# About the study

- Males and females
- Aged 18-60
- Diagnosis of schizophrenia
- Fluency in written and spoken English

Contact [k.hoang@ucl.ac.uk](mailto:k.hoang@ucl.ac.uk) with your name, email address and contact number to take part.

# About the study

## What can you expect?

### Brain Imaging

MEG (magnetoencephalography) is a brain imaging technique which records the magnetic fields in the brain. An MEG scan is completely safe, silent and non-invasive. It will require you to sit for two 90 min sessions as the scanner will be placed just over your head.

During the scan you will be completing a couple of tasks so that we are able to record your brain activity.

It take place on a weekday between 9:00am-5.00pm and will last around 4-6 hours.

### Reimbursement

£12 per hour approximately £70-90 in total.

Contact [k.hoang@ucl.ac.uk](mailto:k.hoang@ucl.ac.uk) with your name, email address and contact number to take part.
